

# The Future In Indoor Comfort & Energy Control

**IDC is a PC based intelligent control system which delivers optimized comfort and maximized efficiency by coordinating HVAC, Indoor Air Quality, and Hydronic Systems in one control.**

The IDC System allows remote access from anywhere in the world for monitoring, managing, and controlling via the web using any web enabled device such as a PC, Smart-phone, or iPad. Building owners or managers want the ability to monitor and control energy consumption, and is fast becoming one of the most important needs of any new control system. IDC gives you the opportunity to do as much or as little as you demand, from a small house to large commercial building.

## BENEFITS

- **Optimized Comfort and Efficiency:** Coordinates HVAC, IAQ, and Hydronic Systems in one control.
- **Flexibility:** Integrates most logical and efficient heat source strategies available, such as heat pumps, solar or conventional boilers.
- **Energy Savings:** Allows integration of KWh or other meters for monitoring of consumption.
- **Increased Control:** Gives full visibility and control of system performance, energy consumption from anywhere in the world via web enabled devices.
- **Peace of Mind:** Should the need occur, alerts and alarms are immediately communicated to the service company or owner for proper handling.
- **Service Contractors:** Immediate access to a world of information about their installations for troubleshooting before dispatching service personnel.
- **Predictive Weather:** IDC receives a constant stream of weather forecast info from the National Weather Service, allowing IDC to better react to rapidly changing conditions.
