

332 Series Manifold

Radiant Heating & Cooling / Plumbing / Snowmelt / Controls

MrPEX® 1 1/2" Brass Manifold is made from high quality alloy extruded and chrome plated after machining, and is offered in 2 through 12 loop configurations. The manifold comes mounted on brackets and is equipped with isolation ball valves with thermometers, and end caps with manual air vent & fill/drain valves. The CV is 1.39 per branch. Branch connections are EK 25

The SUPPLY (upper) manifold is fitted with balancing flowmeters with readable range of 0 to 2 GPM that allow flow adjustment of each individual loop. The flow meters have a brass body and the sight glass is made from temperature and impact resistant plastic, all components are antifreeze resistant up to a 50% mix.

*Shipped as shown

The RETURN (lower) manifold, has manual on/off valves that controls the flow for each individual circuit. The manual knob can be removed to accommodate the MrPEX actuators (part# 5120700 & 5120701) using VA10 adapters.

Supply and return mains can be connected from either left or right sides. The manifold comes ready for a left-hand connection. Connection from the right can be done by removing the manifold body from the brackets and flipping them over.
