

The Future in Indoor Comfort & Energy Control

Elevate your building's intelligence with IDC, an advanced smart control system designed to deliver optimized comfort and maximized efficiency. IDC seamlessly coordinates all the mechanical systems, including HVAC, Indoor Air Quality, and complex Hydronic Systems, into one intelligent control.

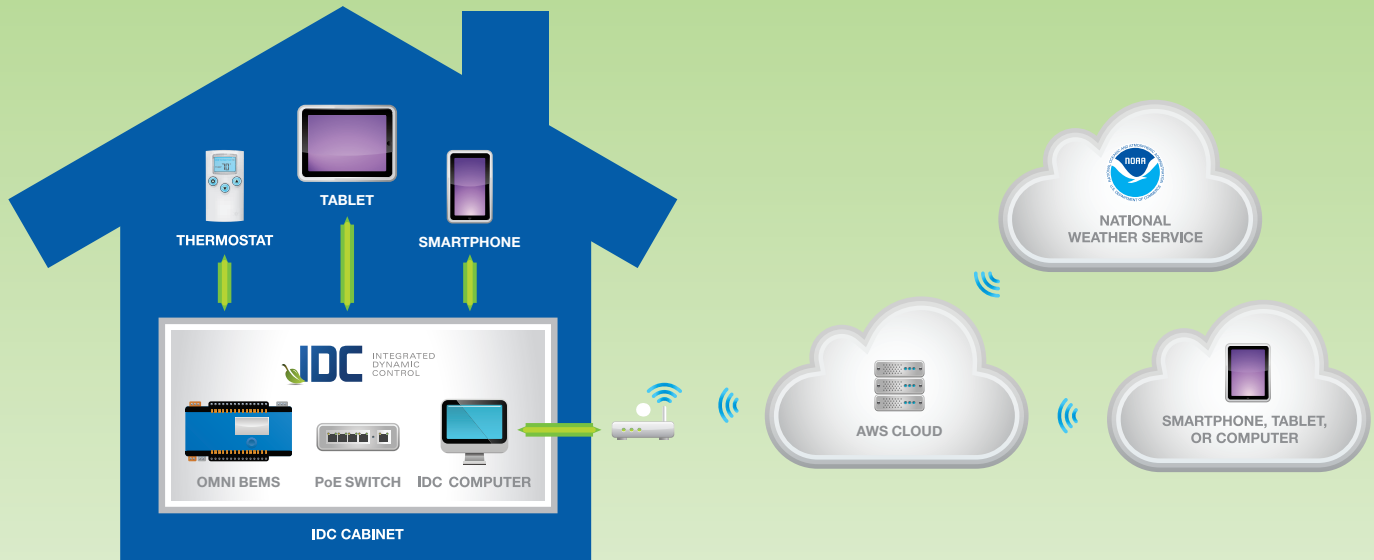

Unlock secure remote access from anywhere in the world with the IDC System, enabling effortless monitoring, managing, and control through any web-enabled device, such as a PC, smartphone, or tablet. Recognizing the growing importance of monitoring and controlling energy consumption, IDC meets this crucial need for building owners and managers. Tailored for versatility, IDC empowers you to customize control based on your requirements, whether it's for a small house or a large commercial building. Experience the freedom to decide how much or how little control you demand with IDC.
