WHO IS MrPEX®?

MrPEX®-Tomas Lenman-started at Wirsbo Bruks AB in Sweden as a development engineer in 1971, developing the very first PEX process ever invented. He developed many Standard Specifications for PEX Tubing in Europe and Australia. MrPEX® wrote the ASTM F 876/877 for PEX Tubing during 1982 -84. In 1982 he co-authored the book "Water and Pipes". He founded and managed Wirsbo Company (USA) 1984 -1992 and continued consulting for this group until 1996. He authored the CSA B137.5 standard for PEX Tubing in 1989. MrPEX® managed the successful start-up of Roth Industries PEX Tubing Division 1997 -2001 after which he started his own radiant floor heating company: MrPEX® Systems using PEX Tubing with exclusive distribution in North America for LK PEX AB in Sweden. The unique production process is invented by Mr. Lennart Aagren of Sweden, previously manager of Uponor Innovation AB for many years, and his second innovation of a PEX Tubing manufacturing process. No one has more knowledge and experience with PEX Tubing and Radiant Floor Heating Systems than MrPEX®.

TUBING

A Slinky[®] is suspended on elastic threads around itself. There is no reinforcement along its length. Thus making it remarkably flexible and free to move. The shape remains round. It never kinks, although the bending radius is minimal.

Similarly, PEX molecular chains extend around the tubing like the Slinky® string circles around itself. This makes MrPEX® Tubing extremely flexible and less likely to kink. The molecular chain is aligned to resist stress around its perimeter. It is unusually strong, resisting inside pressure.

The molecular orientation is achieved during extrusion in a very unique process. Crosslinking occurs simultaneously with the orientation. Peroxide

MrPEX® Barrier PEX
Tubing has an Oxygen
Diffusion Barrier which
meets the stringent
requirements of the European
DIN 4726 standard. This standard
restricts the amount of oxygen that
is allowed to permeate the pipe and affect corrodible
cast iron or steel components within the system. The
standard restricts permeation to less than or equal to
0.10 g/(m3 d). This is considered to be a safe level.

MrPEX® PEX-a TUBING W/ OXYGEN BARRIER

MrPEX® Barrier PEX tubing is Cross-Linked Polyethylene (PEX-a) manufactured in accordance with ASTM F 876. Tubing is listed to ASTM F 876/877 (CSA B137.5) and ICC-PMG 1053, and also certified by NSF (NSF-rfh). MrPEX® Barrier PEX tubing is rated by the Hydrostatic Stress Board of PPI (Plastics Pipe Institute) at: 160 psi at 73.4°F; 100 psi at 180°F; 80 psi at 200°F. MrPEX® Barrier PEX tubing has an EVOH oxygen barrier that meet DIN 4726. Tubing sizes 3/8" through 3/4" also has a thin coating of PE on top of the barrier in order to reduce noise when installed in joist applications and Aluminum heat transfer plates.

PEX FITTINGS

F2159 PPSU PEX PRESS FITTINGS

MrPEX® plastic fittings are made from a blend of engineered high performance PolyPhenylSUlfone (PPSU) resin to achieve a long-term durable product. These PPSU fittings are durable, light weight, corrosion free, and resistant to chlorine and other substances that may be present in today's potable water supply. The Sulfone resin has been used and refined over the past 20 years and has proven a very reliable replacement for brass and copper fittings. MrPEX® fittings are listed to ASTM F2159. MrPEX® Stainless Steel Press Sleeves and PEX Press tools are required and purchased separately.

INTEGRATED DYNAMIC CONTROL

The Ultimate In Indoor Comfort, Snowmelt & Energy Control!

IDC is an intelligent control system which delivers optimized comfort and maximized efficiency by coordinating all the mechanical systems of your building including HVAC, Indoor Air Quality, and Hydronic systems in one control. IDC is the optimal control system for incorporating radiant floor heating and cooling systems, with renewable energy sources such as solar, heat pumps, or others. IDC also offers complete integrated multi-zone snowmelt control. The IDC System allows remote access from anywhere in the world for monitoring, managing, and controlling via the web using a Smartphone or tablet. IDC gives you the opportunity to do as much or as little as you demand, from a small house to large commercial building, and brings intelligent control technologies, previously exclusive to large-scale commercial buildings, into the residential and mid-range commercial market.

The system brain consists of programmable I/O blocks that are BACnet and Modbus native, and a Linux PC that provides high speed, secure connection to any device. Wired to the cabinet are all the sensors, equipment, and control devices. The system comes standard with a 10" touch screen control interface that can be mounted in the living area. If individual zone control is desired, 5" touch screens provide the user with complete control. The IDC system is custom designed for each application, therefore we provide quotations on a project-by-project basis.

Please contact MrPEX® Systems or your local rep for pricing.

The Sulfone resin has been used and refined over the past 20 years and has proven a very reliable replacement for brass and copper fittings. MrPEX® multiport tees meet ASTM F2159. MrPEX Stainless Steel Press Sleeves and PEX Press tools are required and purchased separately.
