

# The Future in Indoor Comfort & Energy Control

Revolutionize your control with IDC, the advanced smart system designed for radiant heating and cooling professionals. Seamlessly coordinating HVAC, IAQ, and Hydronic Systems, IDC delivers optimized comfort and efficiency. Gain secure remote access worldwide via the IDC System, tailored for both residential and commercial installations. Customize control effortlessly from any mobile device. Empower your radiant heating and cooling projects with IDC.

**Comfort & Efficiency:** Ideal indoor environments achieved through HVAC, IAQ, and Hydronic Systems synchronization.

**Security:** IDC uses MQTT protocol with end-to-end encryption.

**Control:** Global visibility and control for system performance and energy consumption.

**Intuitive Design:** User-friendly interface with easy-to-use graphics

**Flexibility:** Logical and efficient operation with integration of various heat sources.

**Peace of Mind:** Swift issue resolution and peace of mind through instant alerts.

**Energy Savings:** Efficient energy management with consumption monitoring.

**Service Support:** Troubleshoot efficiently with access to installation information.

**Predictive Weather:** Quick adjustments facilitated by accurate weather forecasts.
